<b>Size: Width x Depth x Height</b>	Mm	<b>625 x 316 x 720</b>
<b>Weight</b>	Kg	<b>21</b>

## Operation

The Hygro Air Humidifier just requires filling with water, made easy by using the funnel supplied with the unit. Adjustable air flow grilles allow users to direct the humidified air where it is needed most and the adjustable automatic humidistat makes it easy to set the desired humidity level.

Easily portable with no permanent installation required, this unit is suitable for any application, especially air conditioned offices containing high concentrations of PC's and other heat generating equipment.
