

Keep cold and contaminated air outside

Due to its broad range, the EASYAIR water-supplied or electric air curtain can be used in any sort of open entrance, such as in shops, supermarkets, builder's merchants, offices and hospitals. The air curtain is suitable for an installation height of up to 3.50 metres and is available in widths from 1.0 to 3.0 metres.

The use of a three-row heat exchanger means that the EASYAIR air curtain is energy efficient. The water-supplied air curtain is supplied as standard for a low water temperature of 60/40°C. The conversion table may be used for other water temperatures.

By using a thermostatic 3-way valve, the air outlet temperature of the air curtain can be kept constant.

Suitable for use in shops, offices, hospitals and factories.

Features:

- Extensive range
- Standard white finish
- Simple installation
- Easy to maintain

Accessories – additional sections

Type GTM I
 5-position controller for hot water air curtain.
 Do not switch more than 10 air curtains in parallel on one GTM I controller.

Dimensions 122 x 70 x 35 mm

Type GTM IE
 5-position controller for electrically heated air curtains.
 Standard controller. The parallel connection of multiple air curtains on one controller is not possible!

Dimensions 122 x 70 x 35mm

Connecting cable between controller and air curtain

Thermostatic three-way valve

Room thermostat

Door contact

Ceiling fixing set

Assembly/location suggestions
