## Thermozone® AR 300 E/W

AR300 is especially suited for environments with high demands in respect of design. The recessed installation is very discreet and the built-in control contributes further to the concealed appearance.

Installation height up to 3,5 metres.

Easy to service via big hatch in the bottom of the unit. The filter is cleaned from the outside.

Colour (frame and hatch): white, RAL9016

Height: 302 mm

Depth: 595 mm

CE compliant.

### Control AR300

The built-in control of AR300 is designed to give the highest level of functionality while minimizing installation and daily operation. No additional wiring or external controls are needed.

The air curtain operates at its maximum performance in all situations and is not dependent on day-to-day adjustments.

When the door is open the air curtain separates outdoor and indoor air and provides heat if it is needed.

When the door is closed the air curtain operates as part of the heating system supplying additional heat if indoor temperature falls below desired temperature.

There are also possibilities to connect the air curtain to a BMS system for on/off control and alarm indication.

### Product specific accessories, AC 200

#### CB20, control box

Controls the airflow in 2 steps. CB20 is used for AC200 without heat. Can control several units. Max input 10 A. IP44.

#### CB22, control box

Controls the airflow and heat output in 2 steps. CB22 is used for AC200 with electrical heat. Can control several units. Max input 12 A. IP44.

#### ACR20, control box

Controls the airflow in 2 steps. For internal mounting in AC200 without heat. Max input 5 A. IP44.

#### ACR22, control box

Controls the airflow and the heat output in 2 steps. For internal mounting in AC200 with electrical heat. Max input 5 A. IP44.

#### 22007, control box

Controls the airflow and the heat output in 2 steps. Fitted in a box on the wall (raised frame is included). For AC200 with electrical heat. Can control up to 6 units. Max input 5 A. IP20.

#### 22005, bracket

When air curtain units are suspended from above, brackets are fitted to the unit, onto which the suspension device (rod, wire, etc) is attached. Two brackets are needed for AC models of one metre and three brackets for the other models.

Product specific accessories, AC/WAC 300/400

ACR304, 4-step fan speed control

Controls the fan speed in 4 steps. The fan is turned off when the door closes. Can control a maximum of 5-7 units. Max input 14 A. IP44.

ACR3042, 4-step fan speed control, high/low speed

Similar to ACR304 but one speed is selected for when the door is open and a lower speed is selected for when the door is closed.

ACR3042T, with time relay

Similar to ACR3042 but also equipped with a time relay. When the door is closed, the fan will remain at the selected speed for a desired period. This function is particularly useful when a door is frequently opened and closed.

2221AG, stepless fan speed control

Single-phase thyristor for stepless fan speed control and for switching off and on. For surface mounting. Fits in rectangular mounting case. Controls a maximum of 2-3 units. Max input 5 A. It controls water heated and ambient units. IP 44.

AXT401/402, adaptation set

Position the outgoing air stream close to the opening when mounting above openings with sectional overhead doors.

AVMP300, mounting plates

For vertical mounting, mounting plates are fitted between units and between the lowest unit and the floor.
