

Heat only where needed

The Mark INFRA-LINE offers the option of heating without displacing air. In addition, heat reaches only the location where it is required. The short warming-up period and the lower room temperature can yield good energy savings. Savings can be as high as 40%.

The aluminium reflective hood radiates the radiant heat emitted downwards. Optionally, this hood can be insulated to increase radiation efficiency.

Mark supplies the INFRA-LINE in 7 different capacities with the length of the unit increasing as the capacity increases.

Possible applications include: sports halls, production facilities, aircraft hangars, showrooms and garages

The benefits of radiant heating include:

- Short warm-up time
- High floor temperature
- Silent
- No air movement
- Low energy consumption
- "Zone" heating
- Heat only where needed
- Efficiency 93%
