*The healthy lifestyle
you deserve in your home*

The natural healthy air cooling system

- No re-circulation of stale air
- Environmentally friendly - does not emit harmful gases into atmosphere
- Balances moisture in the air
- Filters out dust particles
- Portable and easy operation
- Contemporary & stylish design
- Suitable for any small- or mid-size home, apartment or office

Magicool offers consumers a healthy choice

Magicool uses the natural air cooling system that is environmentally friendly and healthy. Fresh hot air is constantly drawn from the outside through a special cooling pad that is saturated with water. The heat is absorbed and cool fresh air is circulated throughout the room. There is no re-circulation of stale air within the room. The cooler also has control that allows you to balance the moisture in the room if the weather is too dry.

*Environmentally
Friendly*

Compact, powerful and quiet

Magicool has been designed to provide customers with true value for money, with its compact design and technologically advanced features, giving customers peace and comfort. Magicool comes with the sophisticated, high-tech and ultra-powerful Stealth^{®1} fan that provides more cooling than any other small cooler. What's more, the fan is also super quiet, giving you long undisturbed sleep on the hottest nights.

*Ultra-powerful
Stealth[®] fan*

How to use Magicool

Magicool is easy to operate. Simply add water, plug it in and turn it on, and adjust the water flow and fan speed to your desired comfort level. For maximum efficiency, place the back of Magicool to an open window or door to draw in 100% fresh air. Open another window/door on opposite side of room to create "flow through" ventilation

*Fill water
here*
