

ATEX Approved EExd Cabinet Style Convector Heaters (KC/F1)

APPLICATION

KC/F1 heaters can be installed where potentially explosive gases may be present and are suitable for Zone 1 and Zone 2 hazardous areas and for gas groups 11A and 11B.

They must be mounted horizontally and operated where ambient temperature does not exceed 40°C. The heaters stamped T3 can be installed in areas designated T3, T2, or T1. Heaters stamped T4 can be installed in areas designated T4, T3, T2 or T1.

Typical applications include paint stores and petrochemical installations. Their tough and compact construction makes the KC/F1 particularly suitable where space is at a premium.

FEATURES

- ATEX certified
- Extremely tough 2mm thick epoxy coated steel cabinet with galvanised steel rear panel
- Galvanised steel bracket for wall mounting
- Sloped top prevents objects obstructing air outlet

OPTIONS

- Built-in externally adjustable thermostat (add suffix T)
- ATEX approved wall mounted EExd thermostat. Ref. KEX-1
