Ceiling heat recovery unit with an efficiency up to 78%

Delivery from stock!

The Mark ERV is the ideal solution for energy efficient ventilation and a comfortable indoor climate. The appliance is equipped with a high efficiency counter flow heat exchanger with an heat recovery efficiency up to 78%. This means that 78% of the energy expelled is supplied to the fresh intake air. This high efficiency means that in many cases no after-heating is required.

Possible applications for the ERV include offices, showrooms, apartment complexes and schools.

The Mark ERV is intended as a decentralized heat recovery unit. For central heat recovery, please refer to the Mark AIRSTREAM.

Optional:

- Electric re-heaters
- Disinfection-unit to sterilize the outdoor polluted air

Product features

- High efficiency for optimal air comfort
- No condensation drain required
- Exchange of heat and moisture
- Energy-saving BLDC motor with 10 speeds
- Innovative high efficiency counter flow exchanger
- Low weight
- Indoor installation
- Automatic bypass, intelligently controlled by outside temperature
- Plug & play control, optional CO2 and humidity control function, remote control and Modbus/BMS* control available
- ErP 2018 ready!

* For type 2000 only available at extra cost. Inquire about the possibilities.

A Mark disinfection unit (MDU) can be used in combination with a Mark ERV. This unit is equipped with a UVC germicidal lamp with a wavelength of 254 nm and a medical photocatalytic sterilization filter to kill bacteria and viruses in a short time. This makes the MDU an excellent weapon in the fight for cleaner air.
