## CD35 PORTABLE DEHUMIDIFIER

Introducing the CD35 Dehumidifier. A valuable new addition to the Ebac hire range and an opportunity to boost your hire revenue. Encasing all the best features of Ebac's domestic dehumidifiers in a strong and durable shell. The CD35 is robust and reliable the answer to a real market need.

## WATER DAMAGE

After builders, private customers are your largest dehumidifier market. Burst pipes, leaking roofs, flooded washing machines, river floods and severe condensation can all have disastrous consequences if not treated quickly. Mould and mildew will not only destroy homes and their contents, they also cause health problems.

Dampness in the home need not be accidental. Shampooing carpets creates moisture which if not removed quickly and efficiently, will lead to the same damp related problems as well as causing the carpet to shrink. (So if you're hiring out carpet cleaners, make sure you also offer a dryer!!)

## THE PROFESSIONAL SOLUTION

You'll already know how powerful and efficient our dryers are from supplying the Building Dryer range to trade customers. Well the CD35 offers the same benefits to your private customers, whatever their temporary drying need. Ebac CD machine offers guaranteed drying performance.

## THE BEST OF BOTH WORLDS

The CD35 is perfect for customer and hire manager alike. They offer all the features of our best selling domestic dehumidifier range, encased in a purpose built, rugged steel shell. So not only are they quiet, reliable, portable and economical, they're also built to withstand daily use and transportation from a constant stream of hire customers.

## EASY TO USE

The CD35 is light and compact enough to be lifted and carried with ease. They require no installation just position the unit where it's needed, plug in, switch on and leave it to get on with the job.

## POWERFUL AND ECONOMICAL

A CD35 Dehumidifier has the power to extract up to 10lts of water in a single day. Yet, because they use energy efficient heat pump technology, running costs are very low, costing no more than a TV. A variable humidistat allows the customer to select the preferred level of dryness and minimize running costs.

## SPECIFICATIONS:

SPECIFICATIONS	CD35	CD35P
Model No.	10186GY-GB	10186PH-GB
Height (mm)	550	550
Width (mm)	345	345
Depth (mm)	350	350
Weight (kg)	26	26
Voltage	230	230
