

Comcool52 High Volume Evaporative Cooler

- 5165 m³/hr Airflow
- Equivalent 71000 Btu/20kW cooling
- 2A running current
- Mains water feed
- 90l internal tank
- Diaphragm pump
- Internal water filter
- Multiple fan speeds
- Tough steel body
- Recessed controls
- Mains cable pocket
- Tank drain system
- Locking castors

A large volume, heavy duty evaporative cooler capable of producing an equivalent 71,000BTU/20kW of cooling from as little as 2A. Designed to take the pounding of everyday industrial use Comcool is Ideal for large open area's where traditional cooling just isn't an option like warehouses, events and hangars and cattle sheds. Comcool can either be connected straight to a mains water feed via a standard hose connection or operated using the internal 90l tank. Featuring multiple fan speed's and a tank purge system that empties the tank of water, Comcool's low electrical consumption offers an excellent environmental alternative to traditional portable air conditioning.
