

FFK 100-50 FILTER CASSETTE

Item no. 30237

Version: F7

Document type: **Product card**
 Document date: **2019-03-19**
 Generated by: **Systemair Online Catalogue**

Description

Filter cassette

A filter cassette designed for bag filters standard type M5 or F7. The cassette housing is manufactured from galvanised sheet steel. It has a hinged cover underneath fitted with a quick release latch, which makes it easy to replace the filter.

The filter cassette can be connected directly on to the duct and should always be fitted in a flat or vertical position. If fitted vertically, the direction of the air flow must be downwards so that the filter bags do not collapse.

BFK filter media, in the M5 or F7 filter classes, are ordered separately and supplied individually.

The recommended final pressure drop is 200 Pa for the M5 filter and 250 Pa for the F7 filter.

The cassette is fitted with connections for connecting to a pressure sensor.
