# FD ECO - FDND - FDNF SERIES

The Fral portable professional dehumidifiers of the series FDNF – FDND are high-performance appliances, equipped with robust galvanized steel frame painted with epoxy resins and mounted on 4 swivel casters that make it easy to move. They have a high efficiency air filter in polyurethane, washable and easily replaceable, and a very large condensate collection tank with the possibility of direct drain. It is possible to install a condensate lifting pump instead of the tank, that allows condensate pumping up to a height of 15 meters from the machine positioning level.

The main characteristic of all the Fral portable professional models of the series FDNF - FDND is the evaporation coil that consists of smooth tubes in aluminium (with the exception of the ECO model). This unique arrangement derived from professional dehumidifiers allows a lower power consumption of the appliance, with a very high efficiency even at low relative humidity. All models include the defrost timer and Hot Gas defrost (except for ECO).

## FEATURES

### FRAME

The frame and the sheets are hot galvanised, epoxy powder coated, ensuring high strength and durability.

### COMPRESSOR

Rotative compressor, mounted on vibration dampers.

### REFRIGERANT CIRCUIT

Evaporator: the evaporation coil consists of smooth tubes in aluminium. The smooth tubes ensure a high yield of the dehumidifier, significantly reducing energy consumption, even at low relative humidity.

Condenser: the coil is made of copper pipes and aluminium fins, the wide size of the condenser fins ensures resistance to dust, long life and easy maintenance of the machine.

### CONDENSATE COLLECTION TANK

The condensate collection tank, installed as standard, is very large and can be easily removed. The machine is also ready for connection to a fixed condensate drain.

### CONDENSATE LIFTING PUMP

Optional in all versions, it replaces the condensate collection tank and allows to remove the condensed water up to a height of 15 mt with respect to the position of the machine. Equipped with an alarm for dehumidifier stop in the case of pump failure.

Alternatively, it is available a condensate lifting pump kit, easily applicable outside the dehumidifier, provided with malfunction alarm that switches off the machine.

### FAN

Axial fan, statically and dynamically balanced, long-lasting and durable.

### AIR FILTER

The air filter, supplied as standard with the unit, is washable and easily replaceable. High-efficiency filter.

### MICROPROCESSOR

Controls the defrosting cycles with hot gas, the timer of the compressor and the alarm card.

### CONTROL PANEL

Located at the top of the machine.

Executed according to the European standards in force.

### TESTING

Tests are performed to check the tightness of the refrigeration circuit. Electrical discharge tests and functional tests are performed as well.

### TECHNICAL STANDARDS

This dehumidifier meets the essential requirements included in the Directives of the European Community 2014/35/EU of 26 February 2014 on the safety of electrical products for use in Low Voltage; 2014/30/EU of 26 February 2014 in the field of electromagnetic compatibility.

The conformity is declared with reference to the following harmonized technical standards:

EN 60335-1, EN 60335-2-40, EN 55014-1, EN 55014-2, EN 50581

Other applied technical standards and specifications: EN 378-2, IEC 60335-2-40:2018 with R1234yf refrigerant.

We also declare that the product is manufactured in compliance with the RoHS Directive in force, that is 2011/65/EU.
