

## Infratower

### Vertical infrared heater

Infratower is a vertical infrared heater of neat design, very easy to place and to use. Its large polished aluminium reflector gives an optimum heat distribution.

Infratower can be used as extra heating for garages as well as for comfort areas such as balconies and terraces.

- Halogen lamp and large polished aluminium reflector for optimum heat distribution.
- Equipped with a tip guard which switches off the heater if it should fall.
- Built-in switch on/off, one for each halogen lamp.
- Equipped with a 1.9 metre cord with plug for connection to an earthed outlet socket.
- Casing in powder-coated aluminium. Colour: black RAL9005.

### Infratower (IP24)

Type	Heat output [W]	Voltage [V]	Max. filament temperature [°C]	Dimensions LxHxW [mm]	Weight [kg]
IHA30BP	3000 (2x1500)	230V~	1800	290x1245x320	7,3

### Our Address

Puravent, Adremit Limited, Unit 5a, Commercial Yard,  
 Settle, North Yorkshire, BD24 9RH

### Dimensions

### Positioning

Infratower is a standalone heater that does not need to be wall mounted or suspended. As it is portable, Infratower can be placed directly on the floor in areas which need to be heated. Several heaters are required for larger areas. Optimum comfort is achieved if the heat is distributed from at least two directions.

### Connection

Infratower is equipped with a 1.9 metre cord with plug for connection to an earthed outlet socket.

### Control

The switches on the unit allow independent selection of output for each lamp (0, 50%, 100%).
