

## The most versatile hot water air heater on the market

The TANNER MDA is a water-supplied suspended air heater which can expel air horizontally or vertically. The unit has a powerful axial fan which means it is suitable for many applications. Mark offers a highly extensive range of accessories for the TANNER MDA allowing it to be aligned to all applications. For example, the unit can be made suitable for external air connection in combination with filtering and a mixing box for the destratification of fresh external air. The unit is also available as an ATEX / EEX-model. (400V) - IP 44 (EX II 2 G EEX e II T3).

The TANNER MDA is designed for use in showrooms, changing rooms, corporate hallways and garages.

#### Features:

- Manufactured with a corrosion-resistant aluzinc housing as standard
- Copper/aluminium heat exchanger
- Highly versatile due to extensive configuration options
- Available as 230V or 400V
- IP class 54

There is also a TANNER MDA+ with integrated drip tray available that is suitable for both heating and cooling

Optional: speed controlled low noise EC-motor (230V/0-10V). Advantages:

- The highest efficiency in case of speed control
- Up to 50% energy saving in case of partial load
- Almost completely linearly adjustable
- Long lifetime
- Low noise level
- Integrated electronic thermal protection

Remote connection possible with the PinTherm Connect!

# Assembly/location suggestions

Tanner MDA maximum assembly height for

**Calculation example:** Tanner MDA 123L (Type 100)

- The table indicates that the air displacement with this unit is:  $L = 1595 \text{ m}^3/\text{h}$
- If the intake temperature ( $T_a$ ) is  $15^\circ\text{C}$ , the table shows that the outlet temperature ( $T_u$ ) will be  $42.8^\circ\text{C}$ . The temperature difference is:  
 $D_t = T_u - T_a$   
 $D_t = 42.8 - 15$   
 $D_t = 27.8\text{K}$

- The table (TYPE 100) indicates that:
  - A** or the basic model, without accessories, the max. suspension height is: = 4m
  - B** or the combination with a destratification hood, the max. suspension height is: = 7m
