# PORTABLE AIR COOLER

## BC 341

Fully conceptualised and manufactured in Europe, the BC 341 is an evaporative cooler designed to lower excessive temperatures in large industrial working areas. Once plugged into a socket and connected to a water supply, the energy-efficient and fully portable unit is ready to deliver cooling. The integrated UV lamp disinfects all water before use to eliminate any risk of virus or bacteria contamination.

**BC 341**

### Advantages

- Powerful air volume 30,000 m<sup>3</sup>/h to cool large working areas
- No installation, no duct work required
- Low running costs
- Easy to maintain
- Evaporative filter pads, blocking dirt
- UV lamp, disinfecting the water
- Low energy consumption – 1.3 kW
- Applications: Workshops and warehouses, plastic, glass, assembly and painting plants, agriculture, greenhouses and aircraft hangars

**CONTROL PANEL**

*To counter the spread of virus and bacteria, the BC 341 evaporative cooler is fitted with UV lamps.*

# PORTABLE AIR COOLER BC 341

Evaporative coolers like the BC 341 are a great choice for extreme working conditions and big and partially or fully open spaces. Using traditional air-conditioners is impractical and too expensive in these environments, and often there are no other realistic cooling alternatives capable of delivering the right amount of cooling in a financially feasible manner.
