Description

Manual five-step transformer

A single-phase transformer which controls the fan speed by altering the supply voltage in five fixed steps. The steps are adjusted manually, using the control knob on the front of the unit. The transformer has 230V terminals for operating dampers, electric heater batteries or other external equipment. When the transformer knob is in position 0, the outlet has no current. The indicator lamp on the front shows that the transformer is in operation. The fuse may be reset from outside. The RE has a selfextinguishing thermoplastic casing.

NOTE! Fans with external contact leads (TK) must always be connected to a motor protection device.

Technical parameters

Default group		
Voltage	230	V
Phase	1	~
Frequency	50/60	Hz
Current	7	А
Enclosure class	IP54	
Dimension		
Width	147	mm
Depth	145	mm
Height	257	mm
Weight	7,05	kg

Name: RE 7 SPEED CONTROL | Item no.: 5003
