## Description

- Speed controllable
- Tilting mechanism for easy servicing
- Maintenance-free and reliable
- Vertical exhaust

The TFE 220 has an impeller with backward-curved blades and maintenance-free external rotor motors. The casing is manufactured in powder-coated, galvanised sheet steel in the standard colours of black or brick red. These fans have integral mains circuit-breakers, and have a tilting mechanism for easy inspection and servicing. Exhaust air is directed vertically from the fans, which prevents problems caused by wet snow and staining of the roof.

To protect the motor from overheating, the TFE 220 has integral thermal contacts with electrical reset. These fans are suitable for use in exhaust-air ventilation systems, in single and multiple dwellings, offices and day nurseries.
