

TFSK 160 EC SILEO RED

Item no. 77258

Document type: **Product card**
 Document date: **2019-06-05**
 Generated by: **Systemair Online Catalogue**

Description

- High efficiency EC-motors
- 100 % speed controllable
- Swing-out

The TFSR EC and TFSK EC roof mounted fans are driven by EC motors and intended for use as extract fans in smaller premises such as self contained flats and apartments as well as storage areas, smaller work-rooms etc. EC-technology is intelligent technology, using integral electronic control to ensure that the motor always runs at optimal load and guarantees an effective utilisation of energy.

The fans are delivered with a pre-wired potentiometer (0-10V) that allows you to easily find the desired working point. The isolation switch is integrated and there are several alternative roof curbs available as accessories. The tilting mechanism simplifies cleaning and maintenance. To protect the motor from motor from overheating, the fans have integrated thermal contacts with automatic reset.

TFSR EC comes with circular base plate whilst the TFSK EC is provided with a square base frame. The horizontal discharge creates smaller internal pressure losses and prevents accumulation of ice on the roof. The protection guard prevents unintentional contact with the impeller. Both models are delivered with a connection box.

TFSR 125-160 are delivered with a Ø 160 spigot and TFSR 200-315 with a Ø 200. For cold climates we recommend that the fan runs continuously to avoid problems with ice.

In case of installing FSD-L flat roof socket, a TDA adapter is needed.

Technical parameters

Nominal data		
Voltage	230	V
Frequency	50/60	Hz
Phase	1	~
Input power (P1)	83,6	W
Current	0,699	A
Max. airflow	0,16	m³/s
R.p.m.	3340	r.p.m.
Weight	4,7	kg
Temperature data		
Max. temperature of transported air	60	°C
Max. temperature of transported air when speed-controlled	60	°C
Sound data		
Sound pressure level at 4 m	49,8	dB(A)
Sound pressure level at 10 m	41,8	dB(A)

Specification text

Roof fan, horizontal discharge, swing type. Casing and base frame made of galvanised steel sheet, powder-coated in black.

Free-running, backward curved, single-inlet centrifugal impeller made of plastic.
Balancing quality G 6.3, dynamically balanced acc. to DIN ISO 1940-1.

Energy-saving, energy-efficient external rotor motor EC, vibration-free mounted, the motor is placed inside the air flow for cooling. Integral thermal contacts internally connected with automatic reset.

Stepless control via 0-10V signal, internal potentiometer.

Terminal block with cable 1m, lead out from the motor. Service switch included (IP44).

For outdoor installation.

Vertical installation position.
