

VOT25 VALVE KIT

Item no. 19033

Document type: **Product card**

Document date: **2019-05-14**

Generated by: **Systemair Online Catalogue**

Description

Three way control valve and actuator on/off

The 3-way control valve controls the water flow in combination with the actuator. Used when the adjustment, shut off and bypass valves are supplied in another way. Controls heat supply on/off.

If a two way valve is required instead of the 3-way control valve included, the third valve opening can be easily plugged (not included).

On markets where there are requirements for a constant return flow (3-way control valve) this is a suitable choice.

DN15/20/25. 230V.

The valve kit consists of the following:

- TRVS, 3-way control valve
- SD230, actuator on/off 230V
