

## FC Direct Fan Heater Controls Heaters

### FC Direct – Entry level control system for a great start

- Automatic fan speed control
- Calendar function
- Built-in temperature sensor
- Outlet temperature limit

[Find more details in our online catalogue](#)

### Easy Set-up and Operation

The system automatically detects any products or sensors that are connected to it and immediately becomes functional. If anything is removed, a notification is sent out, and the system remains operational according to the new conditions.

### Energy optimized Comfort

In auto-mode, the fan speed is adjusted automatically to be just the right speed to achieve the desired heat. Energy is saved and the sound level is lowered.

The fan speed is automatically adjusted in auto-mode, to achieve the right amount of heat with the lowest possible speed and sound level. With the calendar function, you can choose periods of comfort and reduced mode. It is possible to limit the outlet temperature. The control panel has a built-in temperature sensor, which is used for control when external sensors are not used.

Content:

- FCCF control panel
- FCBC05 communication cable, 5 m

In addition to the package, components can be added to expand and customize the system, please see accessories.

## Technical parameters

### Nominal data

Enclosure class	IP44
-----------------	------

### Dimensions and weights

Weight	0.1 kg
--------	--------

## Accessories

- FCBC05 Communication cable (74718)
- FCBC25 Communication cable (74720)
- FCOTX Outdoor temp. sensor (74695)
- FCSC10 Sensor cable (74721)
- FCWTA Water temp sensor (74702)
- FCBC10 Communication cable (74719)
- FCLAP Com. unit for app (74699)
- FCRTX Ext. room sensor (74694)
- FCSC25 Sensor cable (74722)
