Apartments

VTC 1.3+ Lite

5 Year
Manufacturers
Guarantee

▶ ENGINEERED FOR RELIABILITY

*in a range of options to meet
your project demands*

The **VTC 1.3 Lite range** operates by efficiently recovering heat from the air extracted from wet rooms (bathroom, kitchen etc.) that would normally be expelled to the atmosphere.

This heat is then transferred to the fresh air being drawn into the system, which is then filtered and distributed throughout the habitable rooms (living room, bedroom etc.).

The **VTC 1.3 Lite** range can significantly reduce the space heating demand of a property whilst also delivering a healthier and more comfortable indoor environment for the occupier.

Core Features

- Up to 92% heat recovery efficiency
- Down to 0.42 w/l/s specific fan power
- 100% Variable fan speed control
- Independent fan speed control
- 230v Auto-boost integration
- Potentiometer or digital control models
- Variable boost over-run timer
- Tempering summer bypass, 100% filtered
- Integral humidistat
- Automated frost protection
- Wall, floor or ceiling mount models
- Standard or inverted (LH, RH duct connection) options
- Easy access filters
- 5 year guarantee

▶ UNRIVALLED PERFORMANCE

delivered by true innovation

EXTRACT FROM INSIDE

Warm, moisture-laden, polluted air extracted from wet rooms (bathroom, kitchen etc.)

SUPPLY TO INSIDE

Warm, filtered, fresh air supplied to the habitable rooms (living room, bedroom etc.)

Range down to

0.42 W/l/s

Specific Fan Power

Streamlined, low-turbulence airflow path design coupled with state of the art EC fan technology ensures the VTC 1.3 Lite range has one of the *lowest power consumption* (W) per volume of air (l/s) outputs in its class, minimising running costs and setting a new standard in HRV system efficiency.

Range up to

92%

Heat Recovery Efficiency

Incorporating the market leading Recair™ counter-flow, air-to-air heat exchanger, the VTC 1.3 Lite range succeeds in transferring up to 92% of the heat from the extract air being taken from the wet rooms to that of the fresh air supply stream.

This ensures *high levels of indoor air quality* can be maintained while greatly minimising heat loss.

▶ VERSATILE INSTALLATION

options for a quick and easy fit

Suitable for
Small to Medium
Dwellings and
Apartments

WALL, FLOOR or CEILING Mount

Three different mounting types to suit your project requirements. One performance standard. Zero compromise. Unlike competitor products, the intelligent design of the VTC 1.3 Lite range allows it to be supplied in wall, floor or ceiling mount while retaining the same high efficiency, low specific fan power and airflow performance.

WALL MOUNT

FLOOR MOUNT

CEILING MOUNT

DUCT CONFIGURATION Set-up

The ducting configuration of VTC 1.3 Lite range is factory set and supplied to order, changing the external duct connections from the right to the left of the system as required for specific property types thus minimising ducting runs, system pressure and installation time.

POTENTIOMETER or Digital Control Options

Benefit from precise and responsive potentiometer controls or, for added intelligence, choose our new digital option that sets a new benchmark in engineer and end user control.

STANDARD CONFIGURATION

INVERTED CONFIGURATION

Potentiometer

Digital Control

AIR QUALITY CONTROL

delivered by intelligent sensor technology

AUTO-BOOST Integration

The programmed boost (high) speed setting can be easily triggered via any 230v switched live signal (e.g. bathroom light, PIR motion sensor, boost switch, BMS) offering multiple means of intelligent, automatic control integration. This ensures pollutants are extracted immediately when created and at a much quicker rate.

Integral HUMIDISTAT

Continuously monitoring the humidity level (% RH) of the extract air from the property, the system's integral humidistat automatically operates the boost (high) setting of each fan to reduce indoor humidity levels to the preferred, adjustable RH comfort level.

Tempering SUMMER BYPASS

A variable, tempering summer bypass mechanism operates by gradually increasing the amount of air directed around the heat recovery core as the temperature of the supply air from outside rises. This automatic feature helps to ensure total user comfort during warmer summer months by reducing the amount of heat being added to the fresh, filtered supply air.

QUIET by Design

Streamlined airflow path design coupled with custom engineered fan scrolls help to ensure low internal air turbulence and guaranteed balanced fan operation, *greatly minimising occurrences of in-duct noise transference.*

A high density, expanded polypropylene casing further succeeds in limiting any potential break-out noise from the fan operation.

Tested according to BS EN 13141-7:2010; Breakout quoted spherical. Supply and extract quoted hemispherical. For sound data at a specific airflow duty, please contact us directly for a bespoke acoustic schedule for your project. Further sound data at increasing pressure (Pa) levels is also available in the O&M manual.

VTC 1.3 Lite Range Specification

Weight: 11kg **Guarantee Period:** 5 Years

Materials:

- Main enclosure: High density, impact resistant EPP (Expanded Polypropylene)
- PCB & control panel enclosure: ABS FR
- Filters: Polyester media (G3)
- Filter cover: Rubber
- Mounting Bracket: Zinc Plated Steel
- Fan Scrolls: ABS

Electrical & Controls:

- 230v EC Low energy, backward curved centrifugal fans
- Supplied complete with 4 core flying lead: (Live: Brown), (Neutral: Black), (Earth: Yellow & Green), (230v Switched Live (Boost): Grey)
- Plug and play fan components for easy maintenance

Control Features	Potentiometer Model	Digital Model
Independent fan speed control, 100% variable (Trickle & Boost)	•	• +/- 1%
230v boost input (light switch, PIR, etc.)	•	•
Boost over-run timer (0-15 mins)	•	•
Integral humidity sensor (Boost activation) - Variable RH%, Factory set: 70%	•	• +/- 1%
Frost protection, factory set at 5°C	•	•
Tempering Summer Bypass - Automatic	•	•
100% variable (3rd Purge Speed)	•	•
Fault alert/ diagnostics	•	•
Filter check reminder	•	•
Hours run meter	•	•
Status indication (Summer bypass, frost protection, etc.)	•	•
Performance indication (W/l/s, Temp)	•	•
PIN Protect engineering settings	•	•
Commissioning settings upload	•	•
Night mode	•	•
